NAVIGATIONAL ECHO SOUNDER

Model:
FE-800

NAVIGATIONAL ECHO SOUNDER

FURUNO Navigational Echo Sounder FE-800 displays the clearance below the ship in the dual frequency operation*

- ▶ **Dual frequency display (50/200 kHz)***
The depth at the FORE and AFT positions can be displayed simultaneously.
- ▶ **A variety of display modes available: NAV, OS DATA and HISTORY**
- ▶ **High contrast 8.4" LCD**
- ▶ **When interfaced with FURUNO remote display RD-20/50, depth information can be observed at a remote location**
- ▶ **Optional printer interface available for printing out echogram**
- ▶ **Connecting a PC with the optional data recording software allows you to store, compile and print out the past data of the echogram via PC**
- ▶ **BAM (Bridge Alert Management) ready****
Meets the specific requirements for alerts and interconnection with Bridge Alert Management in IMO MSC.302 (87)
** BAM capability is to be implemented as software update after the product release in early 2015.
- ▶ **Depth data for the past 24 hours is storable in the internal memory**
For the amount of data for storage and playback on the FE-800, please refer to "HISTORY" on the right page. With the optional PC software, the sounding information can be stored and played back for 24 hours, when the recording interval is set at 5 sec.

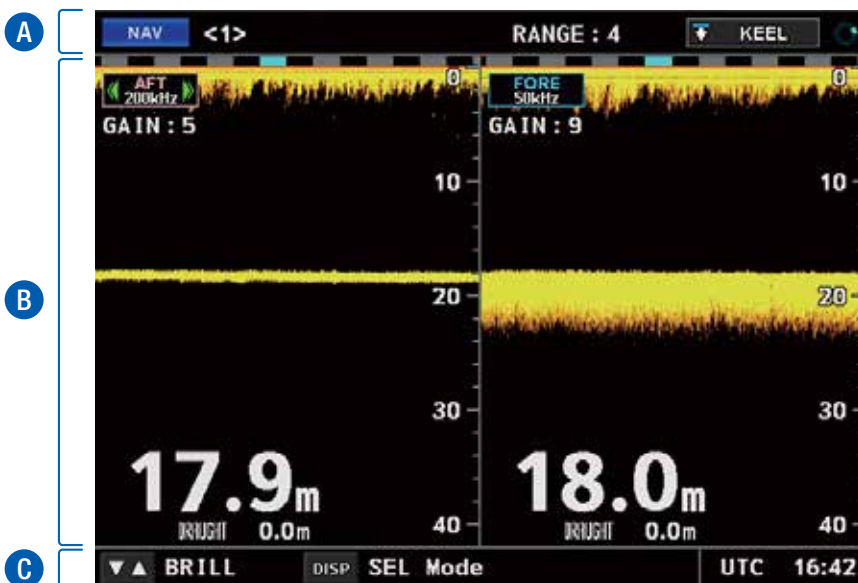

▶ Visual and audible alerts

The FE-800 generates alerts when the water depth below transducer is shallower than a preset depth. When the seabed is lost due to the lowered power supply or out of range scale, an alert is generated.

*When interfaced with two transducers

NAV Mode Displays the depth numerically and graphically.

- A** Current range setting, reference point for the depth reading (Transducer/Surface/Keel) as well as currently selected mode are displayed.
- B** This area shows the information specific to the display mode currently selected. Please refer to each of the display modes for details.
- C** Guide to currently available actions is displayed. Under an alert situation, the information about the most imminent alert is displayed.

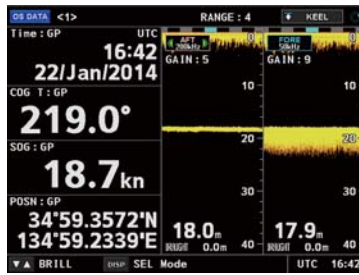

Single frequency display (FORE or AFT) ▶▶

OS DATA

Displays Own Ship Data (OS DATA)*

* only available if the FE-800 is connected to an external EPFS (Electronic Position-Fixing System), such as a GPS navigator.

HISTORY

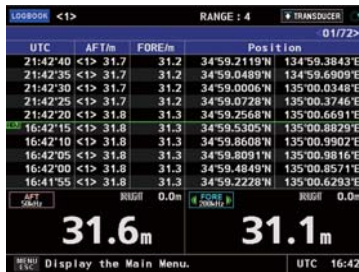

Displays a combination of Contour and Strata echo readings taken.

Recording interval setting	Amount of data for storage and playback
5 sec	1 h
1 min	12 h
2 min	24 h

LOGBOOK

Displays the stored time, depth and own ship position. The logbook is capable of storing data for up to 720 log entries.

Alert Log List

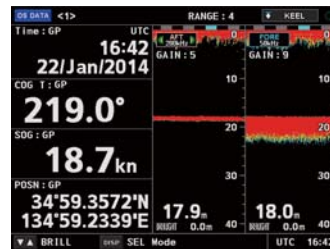

Displays the alert history (containing up to 100 alerts).

SPECIFICATIONS

Product Name	NAVIGATIONAL ECHO SOUNDER	
Measuring Range	50 kHz: 2 to 200 m 200 kHz: 1 to 200 m	
Accuracy	0.5 m at 20 m range, 5 m at 200 m range, or 2.5% of depth range	
Roll/Pitch Tolerance	Roll: $\pm 10^\circ$ Pitch: $\pm 5^\circ$	
Discrimination	more than 5 mm per meter depth on 20 m range more than 0.5 mm per meter depth on 200 m range	
Picture Advance Speed	15 minutes at 200 m range	
Output Power	1 kW rms	
Frequency	50 kHz, 200 kHz, 50/50 kHz, 50/200 kHz, 200/200 kHz	
Transducer	50 kHz: 50B-6B 200 kHz: 200B-8B	
Range Scale	8 steps default: 5, 10, 20, 40, 100, 200, 400, 800 m	
Display	8.4" color LCD	
Display Modes	NAV, HISTORY, OS DATA	
Display Colors	Echo: 8 colors Background/Texts: 3 types (Black/White, Blue/White, White/Black)	
Interface	IEC 61162-450 x 1 RS-232C x 1 (PP-505-FE)	
Input	IEC 61162-1 (IN) x 2	
Output	IEC 61162-1 (OUT) x 4 Contact closure x 1 (Power fail)	
Auto Function	Range, Gain	
Alarm	Power Failure* *At the time of the power failure, FE-800 cannot generate visual/audible alarms. Please interface the equipment which can generate visual/audible alarms to FE-800.
